Hail Creek's New Yellow/Blue Striped Cable

New AmerCable Products

- New TPU Sheath for Underground Cables
- Mine Safe Feeder Cables
- Enhanced Design Type 241 and Type 441

Rio Tinto Hail Creek and AmerCable Power Up the P&H 4100XPC with New Coloured Stripe Type 441 Cables

Hail Creek installed AmerCable's Type 441 yellow sheath/blue striped cable for easy circuit identification on its new P&H 4100 XPC shovel. Some 6 kilometers of cable was required. AmerCable was able to produce the product and meet the tight deadlines required for project scheduling and their commissioning.

AmerCable Celebrates 6 Years in Australia

AmerCable began in Australia six years ago to provide high quality cables encompassing innovative designs, engineering/technical support, and hands-on application advice to customers. Since that time, AmerCable's customer base has grown to include Rio Tinto, BMA, Xstrata, Vale, Centennial, Peabody, Anglo Coal and major contractors and repairers. AmerCable has three new innovative cable designs and is involved in assisting regulators in all aspects of the industry.
